

NOTICE 42-2016: UPDATE - PLIPDECO Launches Upgraded Navis Terminal Operating System – N4

September 19th, 2016

Further to our previous Notice No. 41-2016 dated September 15th, 2016 regarding the upgrade of our Navis Terminal Operating System to N4, we wish to provide you with an update on progress to date.

The upgrade was successfully completed; however, we are currently experiencing some minor technical difficulties resulting in delays at the Port's In-gate and Out-gate. We are working with the Navis team to have the issues resolved in an expeditious manner.

Thank you for your patience and cooperation.

Sincerely,

**Marketing & Business Development Department
PLIPDECO**
